

Marine Electrical Equipment

Ready to take on any environment.

When you need a reliable source of quality marine electrical equipment and products for even the harshest environments, trust Summit Electric Supply. Whether your project involves the construction, maintenance or repair of offshore vessels, offshore drilling rigs or inland vessels, you'll be pleased with our product lines and inventory levels.

Let us assemble everything you need to do the job right — and on schedule.

Demand-Driven Local Inventory

Summit is an authorized distributor of 200+ leading manufacturers, including 70 of the biggest names in marine electrical products, such as CME Wire and Cable, Roxtec, CMP, Eaton, Phoenix Lighting and Aqua Signal.

Products meet most national and international certifications, including American Bureau of Shipping, Det Norske Veritas, Lloyd's Register of Shipping, and U.S. Coast Guard standards. Lighting products also meet Underwriters Laboratories standards.

In-House Marine Cable Braiding, Even In Custom Lengths

Summit's three braiding machines and skilled technicians mean complete control in-house over braiding operations. We can meet your need for custom-length shipboard cable or rig cable — and armor your cable order — often within a week. Choose from our complete line of instrumentation-size, circuit-size and power-size marine cable for shipboard and rig use.

Choose from our broad selection of marine products, including:

- » Fire-rated, water-tight transit systems for both cable and pipe
- » Heavy-duty brass, stainless steel and nickel-plated cable glands
- » Marine electrical distribution equipment and motor control gear
- » Boxes and transit systems
- » Marine and navigation lighting

Visit summit.com/marine for specific product information.
